**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 34-36 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-33 of copending Application No. 10/288,960. Although the conflicting claims are not identical, they are not patentably distinct from each other because both teach a molded pet toy comprising a first interior section made of a material and a second outer section encapsulating the first interior section along upper and lower surfaces, the second outer section being integrally molded with the first inner section.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3644

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 34-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cooper (6,174,214) in view of Willinger (6,202,598). Cooper shows a pet toy 10 having a first interior section 18 composed of neoprene and a second outer section 20 encapsulating the first interior section 18 along upper and lower surfaces of the pet toy 10. The first and second sections 18 and 20 being annular in shape and having an annular lip 12 about the periphery. It is considered that neoprene is a fabric or cloth-type material since it is used or worn by people for outdoor activities. Cooper does not teach the use of a solid material such as rubber or plastic as a second outer section. Willinger shows a pet toy 10 having a first interior section 16 and a second outer section 18 encapsulating and integrally bonded through molding to the first interior section 16. The second outer section being composed of a rubber or plastic material, see column 1, lines 44-47. With respect to claims 34-36, to use the materials of Willinger with the pet toy of Cooper would have been obvious to one skilled in the art as a replacement of functional equivalents.

### ***Conclusion***
